

Coming clean

R-2 ROTARY BIN WASHER

The R-2 Rotary Bin Washer from Durand-Wayland offers high-capacity, effective cleaning for packing house bins. Proper bin washing is critical in eliminating the spread of bacteria, as well as helping to prevent cross-contamination of produce – a key consideration for food safety requirements. The stainless steel enclosure will not rust and is designed to capture water for recycling, which reduces maintenance and operating costs. Our R-2 Rotary Bin Washer is a flexible solution that offers a long list of benefits.

- Bin pusher is an integral part of the rotating drum, and is made of all stainless steel components. Design allows bin washer to easily fit into an existing bin line.
- Bin rotator increases wash time by rotating two bins at once. Bins are rotated slowly while being washed so the entire bin is cleaned. This wash pattern can be adjusted.
- Bin rotator washes bins in upright and upside down positions, allowing trash and rotten fruit to fall out.
- Continuous bin washing during entire cycle (loading and unloading) – wash time dependent on line speed (max 120/hour)
- High-capacity (225 gallons per minute at 150 psi) pumping system increases bin through-put and ensures thorough cleaning
- Stainless steel enclosure will not rust and captures water for recycling, reducing maintenance and operating costs
- High-capacity filtering system attached to the pumping system cleanses water, allowing water to be reused
- Adjustable bin guides allow machine to work with most bin sizes and most packing house lines
- Bins can run through the machine diagonally and horizontally, which means it can be attached to most any type of machine
- Strategically placed, high-capacity wash nozzles allow for maximum bin cleaning
- Motor control system works with most voltage systems
- Unique design is water tight, low profile. Doors and drains properly placed allows easy clean up at the end of the day.

Durand Wayland At-A-Glance

At Durand Wayland, we're taking a fresh look at produce. With more than six decades' experience in the fruit and vegetable equipment industry, Durand Wayland is the single-source supplier for unsurpassed packing house products. We're dedicated to developing the most innovative solutions to our customers' fruit packing and orchard spraying needs, while remaining true to traditional work principles. The end result is the best in equipment and services. For more information, visit us online at durand-wayland.com or call 800-241-2308.
